Description:

Abstract:

Federal American Indian reservations are areas that have been set aside by the United States for the use of tribes, the exterior boundaries of which are more particularly defined in the final tribal treaties, agreements, executive orders, federal statutes, secretarial orders, or judicial determinations. The U.S. Census Bureau recognizes federal reservations as territory over which American Indian tribes have primary governmental authority. Federal reservations may cross state boundaries, and federal and state reservations may cross county, county subdivision, and place

boundaries. For reservations that cross state boundaries, only the portions of the reservations in a given state are shown in the data products for that state. This shapefile contains all tribal lands in the State of Wisconsin.

Purpose:

This data layer is for use in generalized mapping applications. The level of accuracy does not support detailed local analysis. The data layer is intended for use with GIS software.

Security_Classification: None

Security_Handling_Description: None

Native_Data_Set_Environment:

The data set, tribal00.shp, is in ESRI shapefile format created in ArcView 3.2, on a Windows NT platform with a file size of 168 KB.

Data_Quality_Information:

Attribute_Accuracy:

Attribute_Accuracy_Report:

To the best knowledge of the Wisconsin Office of Land Information Services the data accurately represents ground truth. This data layer does not reflect changes which have occurred after the source date. To the best knowledge of the Wisconsin Office of Land Information Services the attribute information is correct.

Logical_Consistency_Report:

No errors were reported upon conversion to shapefile. Attribute information was found to be correct.

Completeness_Report:

This data layer does not reflect changes which have occurred after the source date. To the best knowledge of the Wisconsin Office of Land Information Services, this shapefile includes all known Tribal Lands in the State of Wisconsin. File is 100% Complete.

Process_Step:

Process_Description:

2000 TIGER line files were downloaded in zip format from the Census 2000 web site (http://www.esri.com/data/download/census2000_tigerline/index.html). The files were then unzipped using Winzip. The resulting county shapefiles were merged to create a Wisconsin statewide file. No attribute information was added, all attributes were included in the file that was downloaded from Census. The original shapefile was referenced to NAD83 with units of DD. It was reprojected into WTM83/91, and the final ESRI shapefile was created.
